# Delivering the power of data to justice

Casedoc offers world class justice solutions that help courts and investigative agencies automate information management and workflows, capture and visualize operational data, and simplify and increase public participation.

## FEATURES

### Calendaring

The comprehensive calendar tool serves to display forthcoming schedules and alert users to significant events. It facilitates an organized work rhythm by allowing users to examine different temporal segments, including individual days, weeks, or months.

### Reporting

Casedoc comes equipped with integrated features for generating reports that can present information in both numerical and visual formats. This includes the ability to produce data-focused reports as well as those containing charts and graphics.

### Templates Management

Casedoc enables the creation of templates, and each document has preset information fields that fill in automatically with case specific meta-data, including details like the plaintiff/defendant, case number and other personalised settings.

### Document Storage

All case related documentation is created/collected, stored and accessible for users with the right role and permissions. All actions are recorded and traceable in a convenient history view.

### Casedoc Portal

Ensures secure court data exchange. The Portal is safe and reliable collaboration platform for courts and citizens that brings effective court service at hand.

### Workflow

Casedoc has a powerful workflow feature to set up filling, processing, approvals and editing of case documents based on Court and Justice Administration regulations and protocols.

## WHAT OUR CUSTOMERS ARE SAYING

Optimized court processes and streamlined work environment with Casedoc.

*"We are delighted to confirm that the Casedoc Court software was implemented successfully. The solution has made a significant difference in helping us be more efficient, and we very much appreciate the SaaS delivery model which allows us to easily take advantage of the latest functionality."*

– **Björn L. Bergsson**

Registrar of the Icelandic Appeals Court

## BENEFITS

### Improved Productivity

Optimise and enhance the judicial and investigative procedures by implementing an automated, customizable, and rule-driven workflow system that boosts efficiency throughout all phases of court cases.

### High Return on Investment

Casedoc provides the highest ROI together with a team having extensive experience, our company excels at assisting clients in both identifying and quantifying the ROI associated with case management processes.

### Justice For All

Medium and small courts want access to world-class solutions without the need for extensive upfront services or large IT staffs.

### Impressive Collaboration

Casedoc's built-in collaboration and complete integration with Microsoft Office 365 helping significantly to reduce the disposition time of cases and increasing the effectiveness of the system for its stakeholders. Casedoc empowers teams to collaborate through the synchronization of workflow.

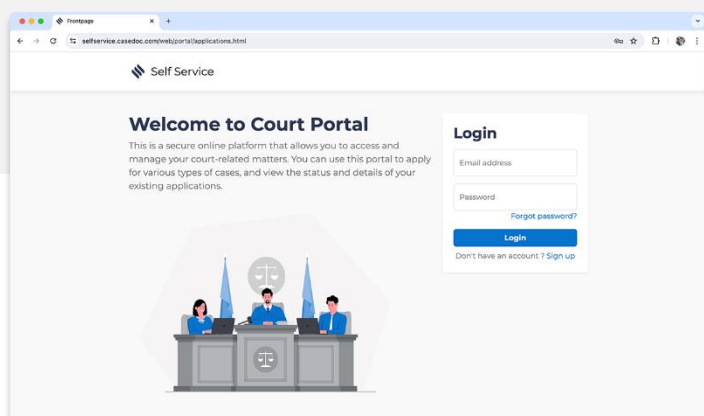

### Full Transparency

Casedoc enhances clarity and openness by providing protected information access, comprehensive dashboards, and organized procedures. The platform ensures that modifications are monitored in real-time, guaranteeing that every stakeholder is up to date.

### Open and Secure Access

Casedoc allocates substantial resources towards the development of security protocols and benchmarks to comply with the rigorous demands of the industry. Every procedure associated with the gathering, handling, and storage of data is subject to strict confidentiality and secure access controls.

## METHODS THAT WE APPLY TO RESOLVE CUSTOMER PAIN POINTS

### Fragmented Solutions

Casedoc is all-in-one court case management system, offering a fully integrated solution that supports a case from start to finish.

### Insufficient Access Control and Transparency Client Communication

By implementing role-based access permissions, which ensure that sensitive information is only accessible to authorized personnel.

### Lack of remote work possibility

Casedoc can be accessed from any location with high availability, and it provides virtual court capabilities, ensuring that justice is accessible regardless of physical location.

### Client Communication

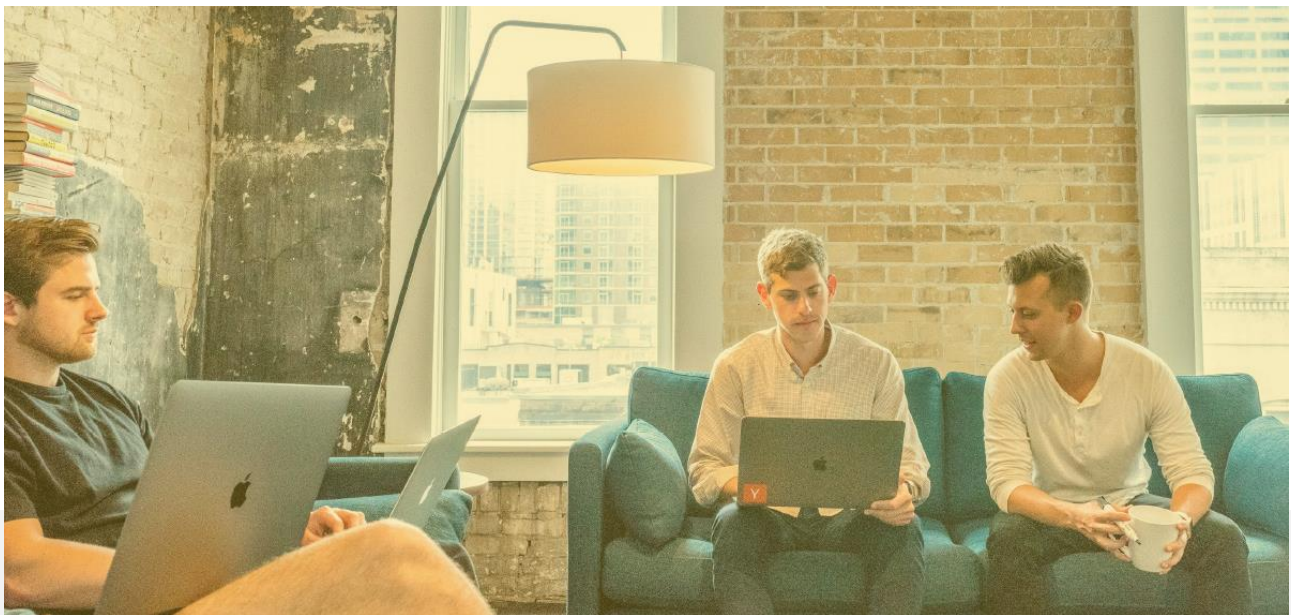

Casedoc Portal enables case stakeholders to enter or update records and add supporting materials. Collaboration supports shared tasks, workflow synchronization and shared to do's.

### Absence of integration

Casedoc provides a rich API which can be used to integrate with existing systems or other third-party applications.

### Absence of established procedures

Casedoc's Process Rules Engine dictates the flow of cases and optimises the judicial processes and procedures, by giving clear and transparent information about the performance and possible bottlenecks in different case types.

## SOLUTIONS

### GENERAL JURISDICTION

End-to-end solution across the pre-trial, in-person & virtual hearing, judgement, and post-trial process.

### ARBITRATION & DISPUTES

Track responsible parties, adopt standardized templates, and ensure consistent processes are followed.

### SPECIALIZED COURTS

Leverage existing templates or customize the workflow and vocabulary for Labour, Military, Housing, Juvenile, Land, Probate, and others.

### COMPLAINTS & INVESTIGATIONS

Both small teams and large departments can follow structured processes, centralize shared data, track milestones, and protect privacy.
